# BOOKROOM

Milton Education's Bookroom contains over 300 audiobooks graded in 26 levels of increasing difficulty. The audiobooks have synchronized text so that students can read along and listen, making that essential connection between what they hear and what they read. There is a wide range of fiction and non-fiction books on topics that appeal to children. At the end of each book, there is a comprehension quiz that students must pass to see the book marked as complete on their screen.

This document lists all of the audiobooks in each level. On the first page of each level, you will find some introductory tables with the characteristics of the readings in that level. Following the introductory page, you'll find the list of books with a short summary and additional information about the book as indicated in this key:

US audio

science

values

UK audio

social science

kids' pick - most read books

As our video content is particularly dynamic, videos are not included in this document, but you can access the videos in Student Mode from the Teacher Panel. This document will be updated periodically when new audiobooks are added to the Bookroom.

Happy teaching!

Level	Grade	Age	CEFR	Book Length	Word Density
1	Kindergarten / 1st grade	5 - 6	Pre-A1	16 - 24 words	2.5 words average per page
<b>Vocabulary Content</b>			<b>Grammar Content</b>
